

# CSD CUSTOM SENSOR DESIGN, INC.

## Sensing Solutions Through Innovation

**CSD** designs and manufactures **high quality pressure transducers** built to perform under the harshest of operating conditions.

We work with you to provide solutions for challenging pressure sensing requirements.

- high pressure
- high temperature
- small size constraints
- weight constraints
- corrosive media
- high vibration
- high shock
- secondary containment
- long term stability

### **Product Capabilities and Services include:**

- pressure ranges to 60,000 PSI**
- operating temperatures from -100° to +500°F**
- industry standard or custom pressure and electrical interfaces**
- custom calibration**
- products for new or existing applications**
